YAML Ain't Markup language

.gitlab-ci.yml

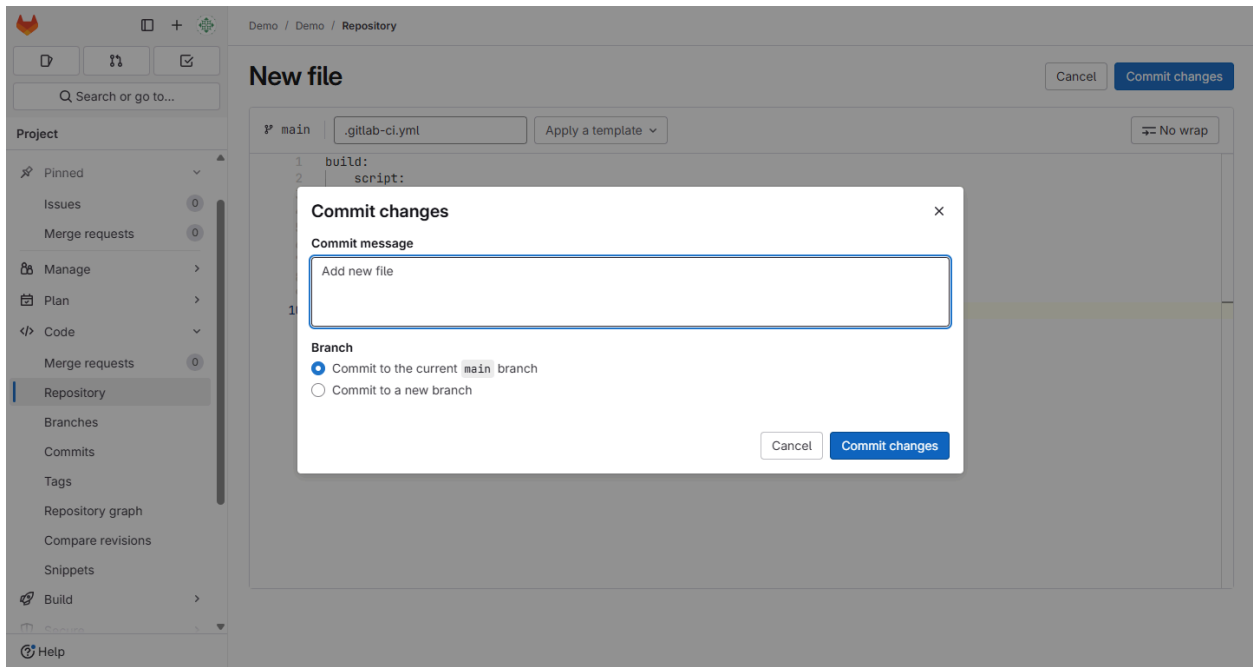

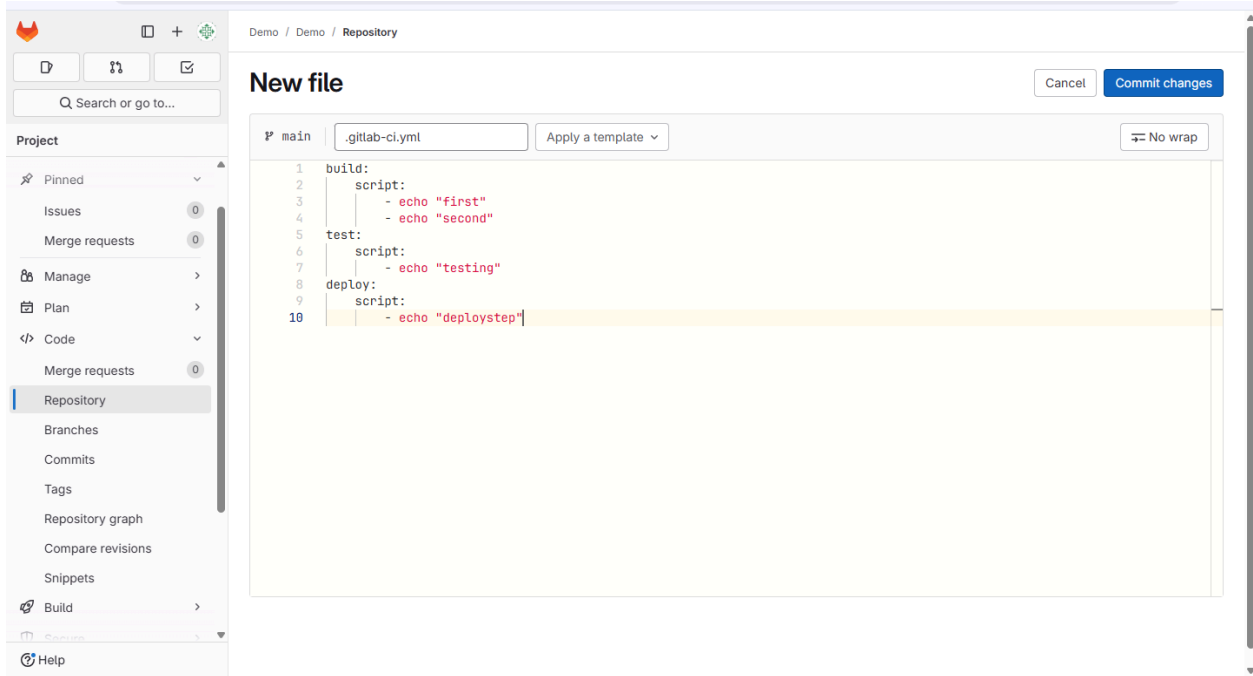

Step 1:

New file → + sign → NewFile → filename:.gitlab-ci.yml

Step 2:

```
build:
  script:
    - echo "first"
    - echo "second"
test:
  script:
    - echo "testing"
deploy:
  script:
    - echo "deploystep"
```

Your work / Projects / New project

Create new project

Create blank project

Create a blank project to store your files, plan your work, and collaborate on code, among other things.

Create from template

Create a project pre-populated with the necessary files to get you started quickly.

Import project

Migrate your data from an external source like GitHub, Bitbucket, or another instance of GitLab.

Run CI/CD for external repository

Connect your external repository to GitLab CI/CD.

You can also create a project from the command line. [Show command](#)
