Roll No: 40 Div: A

Assignment

1. Jenkins Introduction & steps of Jenkins Installation

Step 1: Setup wizard:

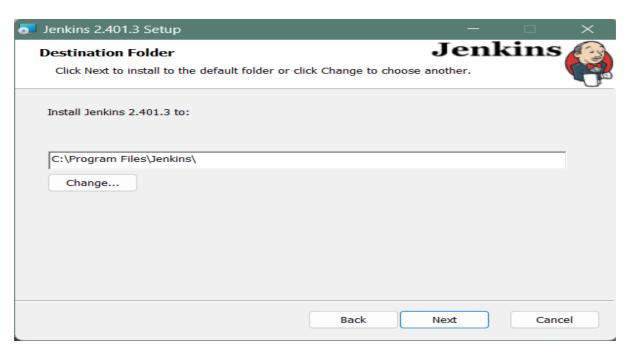

On opening the Windows Installer, an **Installation Setup Wizard** appears, Click **Next** on the Setup Wizard to start your installation.

Step 2: Select destination folder:

Select the destination folder to store your Jenkins Installation and click **Next** to continue.

Roll No: 40 Div: A

Step 3: Service logon credentials

When Installing Jenkins, it is recommended to install and run Jenkins as an independent windows service using a **local or domain user** as it is much safer than running Jenkins using **LocalSystem(Windows equivalent of root)** which will grant Jenkins full access to your machine and services.

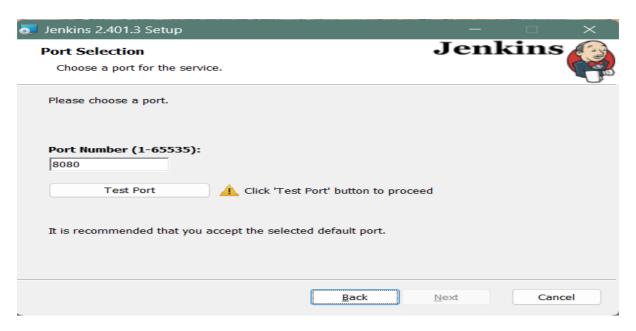

To run Jenkins service using a **local or domain user**, specify the domain user name and password with which you want to run Jenkins, click on **Test Credentials** to test your domain credentials and click on **Next**.

🧓 Jenkins 2.401.3 S	Setup						×
Service Logon Credentials Enter service credentials for the service.			J	enl	kins		
Jenkins 2.401.3 in manner, you must							<i>.</i> .
Logon Type:							
Run service as LocalSystem (not recommended)							
 Run service as 	local or domain	user:					
Account:	user						
Password:		•					
<u>T</u> est (Credentials	Crede	entials must be	tested to o	continue		
			<u>B</u> ack	<u>N</u> e	xt	Canc	el

Step 4: Port selection

Roll No: 40 Div: A

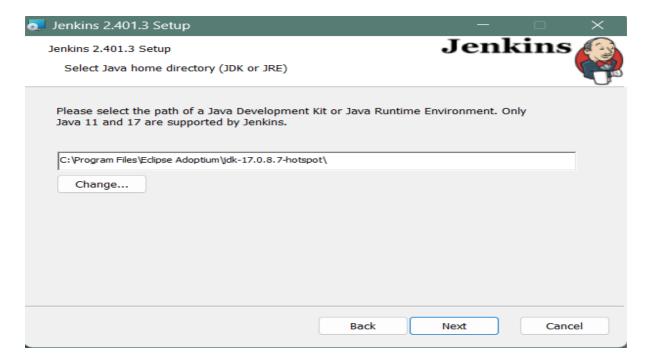

Specify the port on which Jenkins will be running, **Test Port** button to validate whether the specified port if free on your machine or not. Consequently, if the port is free, it will show a green tick mark as shown below, then click on **Next**.

Step 5: Select Java home directory

The installation process checks for Java on your machine and prefills the dialog with the Java home directory. If the needed Java version is not installed on your machine, you will be prompted to install it.

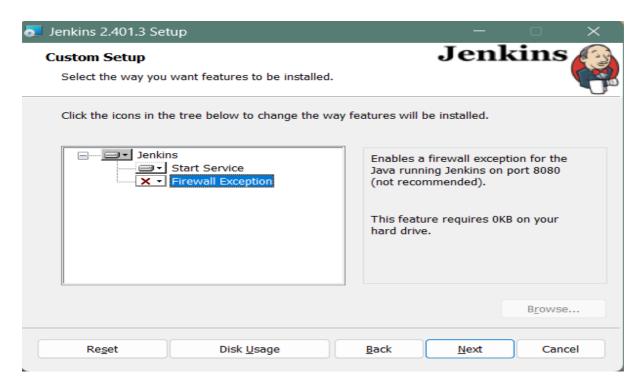

Once your Java home directory has been selected, click on **Next** to continue.

Step 6: Custom setup

Roll No: 40 Div: A

Select other services that need to be installed with Jenkins and click on Next.

Step 7: Install Jenkins

Click on the **Install** button to start the installation of Jenkins.

Additionally, clicking on the **Install** button will show the progress bar of installation, as shown below:

Roll No: 40 Div: A

Step 8: Finish Jenkins installation

Once the installation completes, click on **Finish** to complete the installation.

Roll No: 40 Div: A

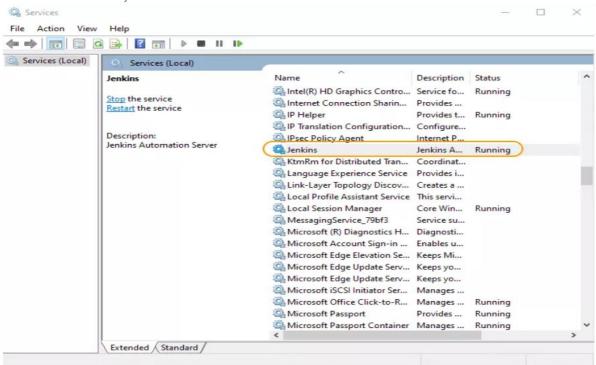

Back

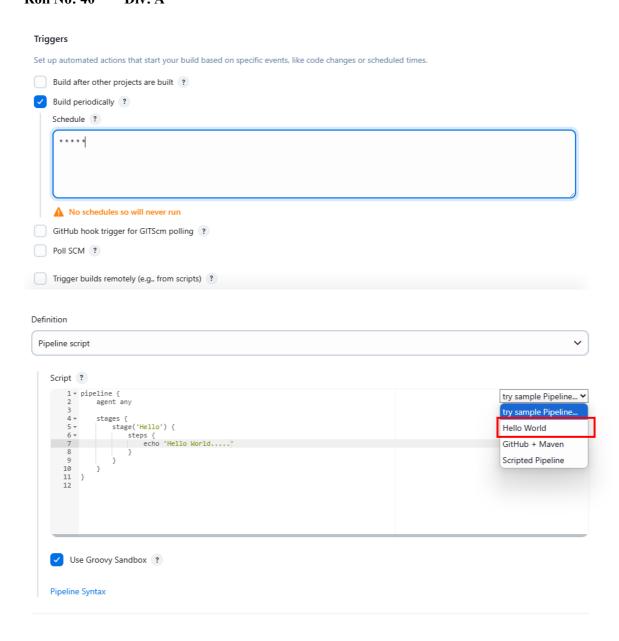

Finish

Cancel

Jenkins will be installed as a **Windows Service**. You can validate this by browsing the **services** section, as shown below:

2.Jenkins – build and deploy a web application to a local HTTP server

Pipeline Script

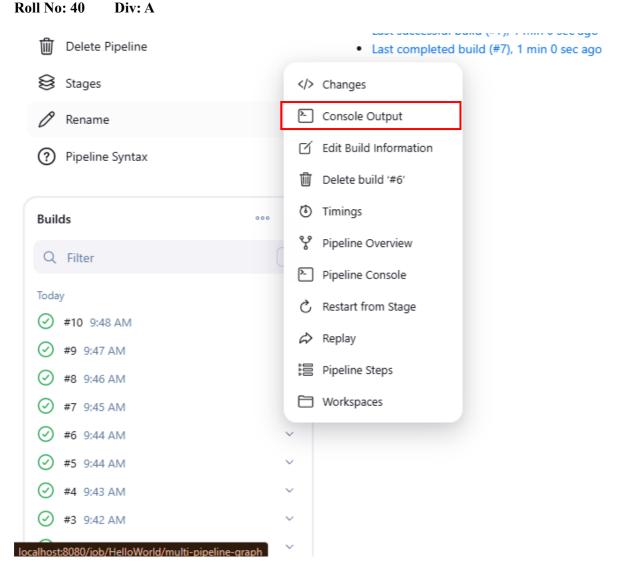

```
pipeline {
   agent any

stages {
    stage('Hello') {
    steps {
        echo 'Hello World.....'
    }
   }
   stage('Build') {
```

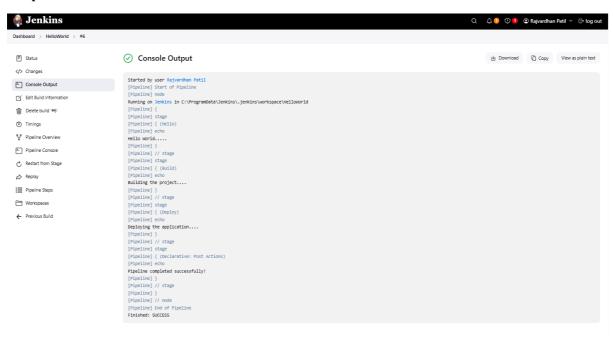

```
steps {
          echo 'Building the project....'
        }
     }
     stage('Deploy'){
       steps {
          echo 'Deploying the application....'
        }
     }
  post{
     success {
       echo 'Pipeline completed successfully!'
     }
     failure {
       echo "Pipeline failed!"
pipeline {
  agent any
  stages {
     stage('Hello') {
       steps {
          echo 'Hello World.....'
        }
     }
     stage('Build') {
       steps {
          echo 'Building the project....'
        }
```

```
stage('Deploy') {
    steps {
        echo 'Deploying the application....'
    }
}

post {
    success {
        echo 'Pipeline completed successfully!'
    }
    failure {
        echo 'Pipeline failed!'
    }
}
```

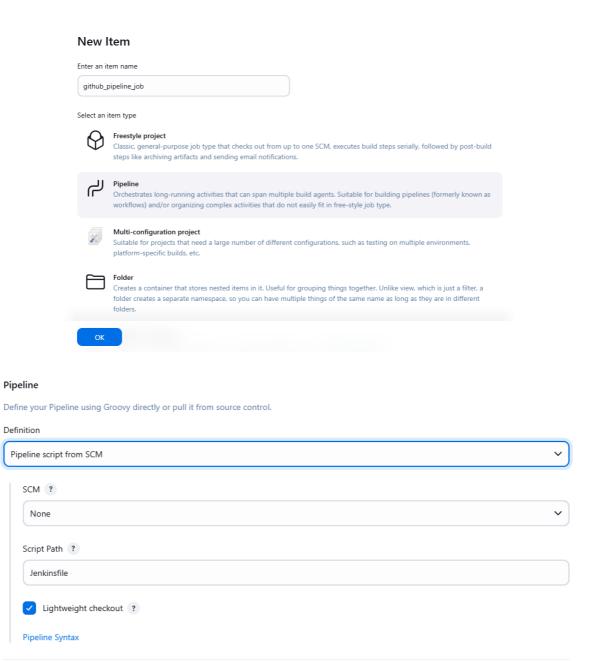

Output:

Roll No: 40 Div: A

3. Jenkins – Integrating Jenkins with Github

Pipeline

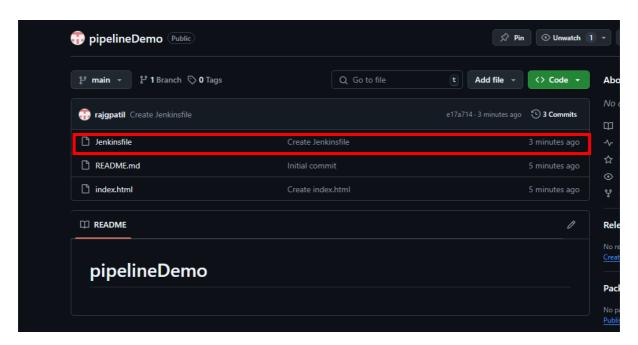

Define your Pipeline using Groovy directly or pull it from source control.

Roll No: 40 Div: A

Triggers Set up automated actions that start your build based on specific events, like code changes or scheduled times. Build after other projects are built ? Build periodically ? Schedule ? H/5 **** Would last have run at Monday, 10 March, 2025 at 10:03:49 am India Standard Time; would next run at Monday, 10 March, 2025 at 10:08:49 am India Standard Time. GitHub hook trigger for GITScm polling ? Poll SCM ? Trigger builds remotely (e.g., from scripts) ?

Jenkensfile:

```
pipeline {
   agent any

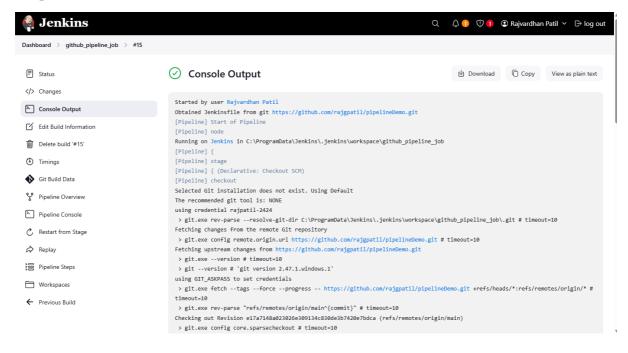

stages {
    stage('Checkout') {
    steps {
        checkout scm
   }
}
```

```
}
  stage('Build') {
     steps {
       echo 'Building the project...'
       // Add build commands here based on your project type
       // For example, if it's a Java project:
       // sh 'mvn clean compile'
     }
   }
  stage('Test') {
     steps {
       echo 'Running tests...'
       // Add test commands here
       // Example: sh 'mvn test'
     }
   }
  stage('Deploy') {
     steps {
       echo 'Deploying...'
       // Add deployment commands
     }
post {
  success {
     echo 'Pipeline executed successfully!'
  }
  failure {
     echo 'Pipeline execution failed!'
```

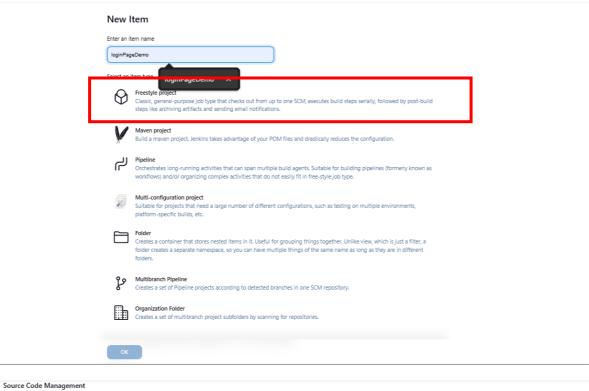

}

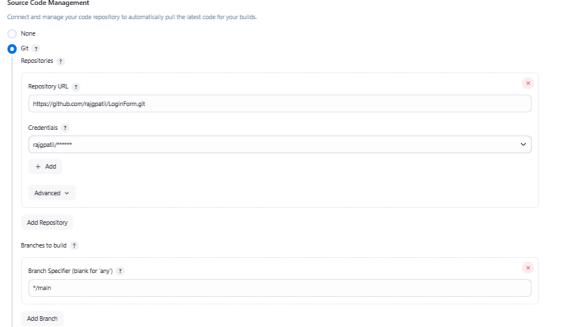

```
}
}
}
```

Output

Roll No: 40 Div: A

Execute Windows batch command ?

Command

See the list of available environment variables

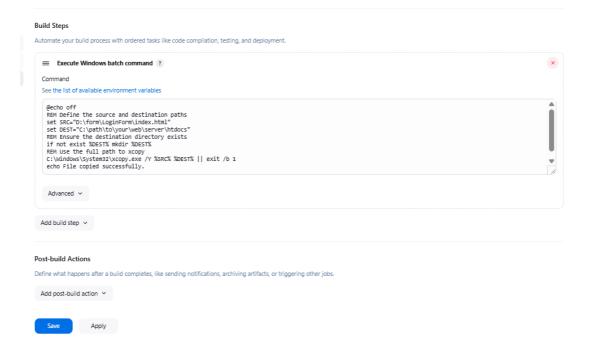

@echo off

REM Define the source and destination paths
set SRC="C:\Users\admin\Desktop\web_app\login.html"
set DEST="C:\path\to\your\web\server\htdocs"

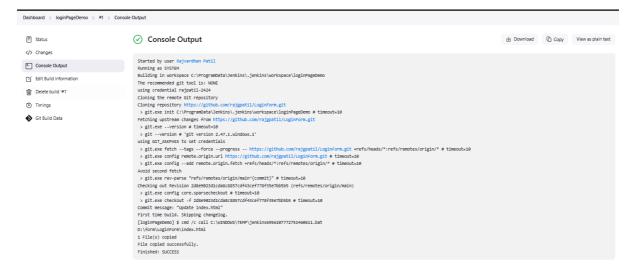

REM Ensure the destination directory exists
if not exist %DEST% mkdir %DEST%

REM Use the full path to xcopy
C:\Windows\System32\xcopy.exe /Y %SRC% %DEST% || exit /b 1

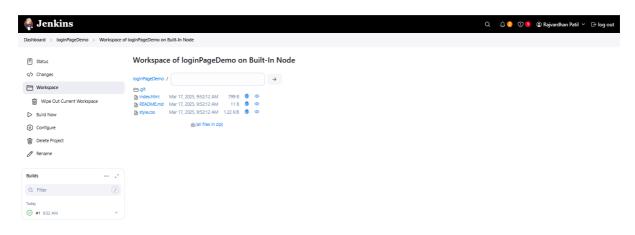

echo File copied successfully.

Output:

Roll No: 40 Div: A

Workspace of loginPageDemo on Built-In Node
